Call in info:

Call in number: [REDACTED]

Conference code: [REDACTED]

Background:

At the meeting held in Albany on 1/15 there was a request that the technical staff from EPA/DEC/DOH hold weekly meetings to develop/come to an understanding on what each agency would be doing/responsible for on this project. I have attached a draft agenda. Please let me know if there's something that you would like to add. However, I would initially like to keep us focused on support for removal and NPL assessment activities.

DRAFT AGENDA
